(+60) 10 390 2302 virginia.ezemaduakor@gmail.com Penang, Malaysia (Open to Relocation)

TECHNICAL SKILLS

Programming Languages SQL (MySQL, SQL Server, Postgres), Python
Data Visualization Tools Power BI, MS Excel, Tableau
Other Tools MS Office (PowerPoint, Word)
Soft Skills Report Writing, Teamwork, Communication

PROJECTS EXPERIENCE

March 2022 – Aug 2022

Internship, 10Alytics Program

Nestle Product Analysis : GitHub Repository

- Applied tailored analysis to determine performances of Nestle products using power BI to provide real-time insights into the product and its marketing funnels to help in its expansion plans.
- Developed a product comparison dashboard of the trend of total sales per product in the last 3 years and generated the monthly sales trend of the product.
- Conducted market research to identify the sales medium with the lowest sales and customer preferences; suggested recommendations led to a 15% increase in business operations.

Charity Organization Report : GitHub Repository

- Extracted insight from donors' behavior using SQL to develop reports on donation data.
- Gathered intelligence on the donation system through procedure analysis and identified results for low donations.
- Proposed solutions to improve system efficiencies and help increase donations.

June 2023 – Nov 2023

Internship, Dataquest Business Analyst Program

Customer Products Analysis : GitHub Repository

- Analyzed low stock and product performance using SQL to determine which products sell frequently with high product performance.
- Surveyed the disparate system to extract information about where the company is making most profit and loss, and the route that accounts for the lowest percentage of total revenue.
- Tailored marketing and communication strategies to customer behaviors by offering rewards, soliciting feedback and offers, to increase sales.

Analyzing Course Performance : GitHub Repository

- Evaluated Dataquest course performance using Power BI to measure Lesson Completion Rate and NPS to determine lessons with high and low completion rate and measure customer satisfaction.
- Proposed decision to improve lessons with a completion rate and NPS score of less than 50%.

Jan 2024 – Feb 2024

Personal Project

Road Accident Analysis : GitHub Repository

- Created Key Performance Indicators' tracker and dashboard to assess accident severity.
- Applied expertise using Tableau to detect factors that contribute to road accidents.

EDUCATION / CERTIFICATIONS

2014 - 2019

Bachelor of Science in Economics, University Utara Malaysia, Sintok, Kedah
Courses: Introduction to Statistical Economics, Basic Econometrics, Development Economics, Research Methods

2022

Master Data Analyst Certificate, 10Alytics. (Analytical skills, Excel, Database and SQL, Power BI)
Python Basics for Data Science Certificate (Python, Data structures, Jupyter notebook, Data types)
