Virginia Ezemaduakor

Penang, Malaysia virginia.ezemaduakor@gmail.com (010) 390-2302 www.linkedin.com/in/virginia-ezemaduakor

SKILLS

- Using and applying foundational math and statistics to perform data analysis.
- Retrieving and manipulating data from databases using SQL.
- Importing, preparing, analyzing, and summarizing data with Excel.
- Conveying insights effectively to tell a story using Microsoft Power BI.

EDUCATION

Bachelor of Science in Economics

University Utara Malaysia, Sintok, Kedah • 2014 - 2019

EXPERIENCE

Data Analyst Intern

10Alytics Internship Program March 2022 – August 2022. Dataquest Business Analyst Program June 2023 - November 2023. Assisted in data analysis and reporting resulting in improved operational efficiency.

- **Project 1:** GitHub Readme Analysis : GitHub
  - Build out the data and reporting infrastructure from the ground up using power BI to provide real-time insights into the product, marketing funnels, and business KPIs to help in the expansion plans; applying tailored analysis to determine performances of current products.
  - Developed a product comparison dashboard of the trend of total sales per product in the last 3 years; making products comparison based on the maximum and minimum revenue generated and developing the monthly sales trend of the product.
  - Conducted market research to identify the sales medium with the lowest sales and customer preferences; suggested recommendations led to a 15% increase in business operations.

- **Project 2**: GitHub Readme Analysis : GitHub
  - Conducted an analysis of donors' behavior by developing reports based on donation data.
  - Gathered intelligence on the donation system through procedure analysis and identified results for low donations.
  - Proposed solutions to improve system efficiencies leading to a 16% increase in donations.

- **Project 3**: GitHub Readme Analysis : GitHub
  - Analyzed low stock and product performance using SQL to determine which products sell frequently with high product performance.
  - Proposed analysis that tailored marketing and communication strategies to customer behaviors by offering rewards, soliciting feedback and offers to increase sales.
  - Created a single report from a disparate system showing a visual representation where the company is making most profit and loss, and the route that accounts for the lowest percentage of total revenue.

- **Project 4**: GitHub Readme Analysis : GitHub
  - Analyzed Dataquest course performance using Lesson Completion Rate metric to determine lessons with high and low completion rate, and Net Promoter Score metric to measure customer satisfaction.
  - Proposed decision based on the analysis to improve lessons with a completion rate and NPS score of less than 50%.
